Lake Elmo, MN

Architect:

Outdoor Innovations

General Contractor:

Outdoor Innovations

Product Manufacturer:

County Materials Corporation

Date:

2020

Key Products:

Elements™ Paving Stones,
Grand Discover™ Pavers

Grand Discover™ Pavers and Elements™ Paving Stones Offer Elegant, Economical Paver Solution for Upscale Pool Deck

Solutions: Dimensionally compatible pavers promote time and cost savings; Genesis Face-Mix Technology™ contributes to lasting color performance

The homeowners of this property sought to expand their outdoor living space with the addition of a luxury pool and surrounding pool deck. They worked with Outdoor Innovations to find an elegant, economical paver solution, capable of withstanding Minnesota's inclement weather conditions.

A solution was found in County Materials' Grand Discover Pavers and Elements Paving Stones. Grand Discover units are larger in size and have fewer joints, visually expanding the pool deck with subtle sophistication. Elements Paving Stones were used to create solidier coursing. Their uniform shape and slightly chamfered edges bring dimension and luxury to the outdoor living space. County Materials' concrete pavers, manufactured with Genesis Face-Mix Technology, ensure long-lasting performance. Their integrally blended, high-strength concrete mix achieves greater durability and vibrant colors that resist weather and high-traffic wear. Concrete pavers emulate the beauty of natural stone and offer greater protection against freeze/thaw cycles, making them an attractive solution for pool deck applications.

Continued on page 2.

Grand Discover Pavers and Elements Paving Stones are part of County Materials' dimensionally compatible paver series, designed to increase design versatility and improve installation efficiency. When placed together, the dimensionally compatible units seamlessly fit together to form clean, contemporary lines without need for on-site cutting. Dimensionally compatible pavers bring custom patio designs to life with the added benefit of time and cost savings.

Grand Discover Pavers and Elements Paving Stones offered long-term value and increased design flexibility to meet the economic and design considerations of this project. Nearly 2,000 SF of County Materials' concrete pavers were installed to create an elegant pool deck that met the homeowners' expectations.

County Materials' dimensionally compatible pavers bring custom patio designs to life at a time and cost savings.
