

CASE STUDY

PROJECT DETAILS

Project Name:

Driftwood Place
Residence

Location:

Minocqua, WI

General Contractor:

Schrom's Excavating

Product Manufacturer:

County Materials
Corporation

Date:

2019

Key Products:

Grand Milestone® Pavers,
Summit Stone®
Landscape Units

Grand Milestone® Pavers and Summit Stone® Landscape Units Maximize Views in Lakeside Deck Project

Solutions: Concrete landscape products withstand four-season weather, readily available products accelerate construction schedule

The homeowners of this waterfront property sought to maximize their sloping backyard with a wraparound deck that features multiple entertainment areas. Located in Northern Wisconsin and susceptible to four-season weather, the deck required durable landscape materials with unmatched longevity.

County Materials' Grand Milestone Pavers and Summit Stone Landscape Units in Timeless were chosen to withstand the elements and achieve the homeowners' desired Northwoods charm. Grand Milestone Pavers are larger in size and visually expand the space. Manufactured with Genesis Face-Mix Technology™, the units feature a high-density surface that resists everyday wear and cracking from freeze/thaw cycles. This inherent durability preserves their appearance with little to no maintenance and ensures lasting performance. Tumbled Summit Stone Landscape Units were used to emulate the character of natural stone with superior durability. Their dimensional shape promoted speed and ease of installation when constructing the project's custom features, such as its decorative railing, deck posts, grill station, and fireplace.

Continued on page 2.

From color to placement, every detail of this project was designed to accentuate the surrounding foliage and lakeside views. Timeless' blend of brown, beige, and gray pigments achieve a subtle appearance that complements and preserves the property's natural characteristics. Grand Milestone Pavers elongate the wraparound deck and draw attention to the lake, while Summit Stone Landscape Units form a low safety railing. Their combined use creates a seamless visual and maximizes project potential.

County Materials' readily available landscape products brought this stunning lakeside deck to life with time and cost savings. Their inherent resistance to weather and wear ensures these homeowners will enjoy this outdoor entertainment space for many years to come.
