

CASE STUDY

PROJECT DETAILS

Project Name:

Wood Street Residence

Location:

Rothschild, WI

General Contractor:

Mitch King & Sons
Excavating

Product Manufacturer:

County Materials
Corporation

Date:

2019

Key Products:

Rib Rock Landscape Block
in Dry Stack texture

Attractive, Oversized Rib Rock™ Landscape Block Maximizes Functional Space In Residential Yard

Solutions: Rib Rock Landscape Block offers durability, efficient installation, and attractive aesthetic

Homeowners in Rothschild, WI, were looking for an attractive, durable, and secure material to build an expansive 190-foot-long, 4-foot-tall retaining wall in their backyard.

Rib Rock Landscape Block manufactured by County Materials were ideal for stabilizing the slope of the homeowners' backyard. The oversized units are specially engineered to protect against freeze/thaw cycles, which makes the blocks an ideal choice for Wisconsin's variable climate.

Rib Rock units offer unmatched design flexibility and can be used for a variety of commercial and residential applications. Measuring approximately 2' x 4' x 2', the oversized units accelerate installation times by covering more square footage faster than traditional wall units. Rib Rock can be installed by a crew of three, instead of five, reducing labor costs as well. The interlocking design of the units promotes simplified installation and enhanced security.

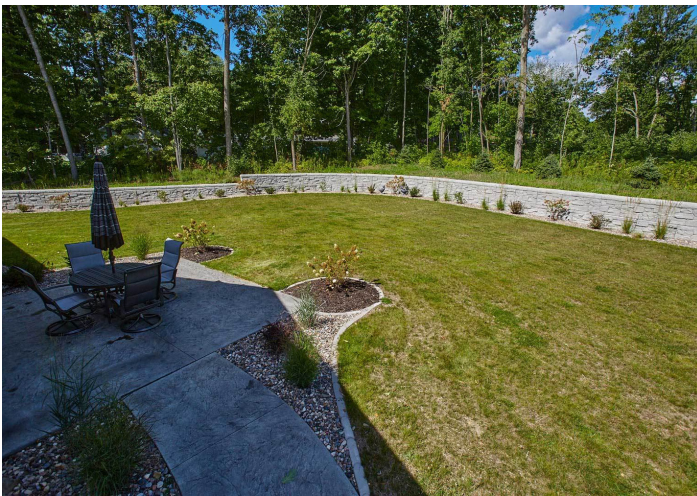

Continued on page 2.

Designed and manufactured to emulate stacked slabs of quarried stone, Rib Rock Landscape Block in Dry Stack texture provided an attractive backdrop to the homeowners' new patio. County Materials also manufactures Rib Rock units in Rough texture.

The ready availability of County Materials' concrete landscape products expedited this project. A crew was able to install the retaining wall in less than four weeks, with minimal disruption to the rest of the homeowner's landscaping.

By leveling the majority of the backyard and installing a retaining wall, these homeowners maximized their property's usable space. The superior longevity of Rib Rock units ensures these homeowners can look forward to a long service life from their new retaining wall.

Rib Rock Landscape Block manufactured by County Materials were ideal for stabilizing the slope of the homeowners' backyard.
