JH Findorff and Sons Inc.

**Product Manufacturer:**

County Materials Corporation

**Date:**

2021

**Key Products:**

Premier Ultra® Burnished Masonry Units and Clay Brick

## County Materials' Premier Ultra® Burnished Masonry Units Provide Cost-Effective and Elevated Façade Solution

**Solutions:** Premier Ultra® Burnished Masonry Units provide a functional and aesthetically-pleasing masonry solution for food lab relocation

Eurofins Food Integrity and Innovation built a larger food lab in Madison WI to increase its capacity. Project leaders sought an upscale, functional façade that would protect the building.

Premier Ultra Burnished Masonry Units, manufactured by County Materials, proved an ideal solution. Premier Ultra units have a polished surface with exposed natural aggregates. Each unit has a one-of-a-kind character and endless design potential. Clay brick supplied by County Materials was used to complement the refined Premier Ultra units and add dimension to the building's modern façade.

*Continued on page 2.*

Manufactured to last, concrete masonry products maintain their appearance and can withstand the elements throughout their service life. Our sustainably manufactured, low-maintenance products are a cost-effective solution that met the project's budget. Both clay brick and Premier Ultra Burnished Masonry Units are fire-resistant and offer incredible structural strength, providing additional safety measures to the food lab.

County Materials' supplied 1,850 SF of Premier Ultra Burnished Masonry Units and 7,000 SF of clay brick to keep the project on schedule for completion.
