Accessories (Alliance
Outdoor Lighting)

County Materials' Landscape Products Provide a Solution to Homeowners' Backyard Space

Solutions: Diverse landscape products offer endless design potential

These homeowners sought a solution to transform their underutilized, sloping backyard into a functional outdoor entertainment space. They worked with Nate's Landscape and Snow Removal and selected County Materials' concrete landscape products and accessories to create a custom patio.

County Materials' Grand Discover™ Pavers paired with an Elements™ Paving Stones soldier course in Reflection were used to create a stunning patio space. Oversize Landscape Steps Units provide safe access to the space, offering a wide step base. The homeowners also chose a Summit Stone® Firepit to complete the outdoor entertainment area.

Continued on page 2.

Manufactured using Genesis Face-Mix Technology™, County Materials' concrete pavers offer lasting color performance and unmatched durability. The integrally colored pavers feature a high strength surface layer, designed to resist age and wear. The patio can also endure the freeze/thaw cycles of inclement winter weather.

County Materials offers diverse landscape products of various sizes, textures, and colors. Providing endless design potential, homeowners can choose the right products for their outdoor living areas. Nate's Landscape and Snow Removal guided the homeowners in their design, product, and color selections to ensure the space complemented their home. The dimensional compatibility and versatility of County Materials' concrete landscape products and accessories allowed this backyard to achieve maximum functionality and unmatched beauty.

County Materials' readily available products were essential in keeping the project on schedule. More than 900 SF of landscape products were installed to create a functional outdoor entertainment area and meet the homeowner's expectations.

The dimensional compatibility and versatility of County Materials' concrete landscape products and accessories allowed multiple features to be installed to achieve maximum functionality of this backyard space.
