County Materials Concrete Pavers Create Inviting Outdoor Entertainment Area

Solutions: Concrete landscape products provide versatility to transform patio space

These homeowners sought to transform their underutilized backyard into a functional entertainment space that they could enjoy for years to come. They worked with MN Pavers to select durable, landscape products to create a one-of-a-kind-patio.

County Materials' expansive collection of landscape products proved an ideal solution. Grand Discover Pavers in Timeless enhance installation efficiency due to their large size. Elements Paving Stones in Reflection and Vision brought luxury and dimension to the outdoor living space while maintaining the homeowners' budget.

Continued on page 2.

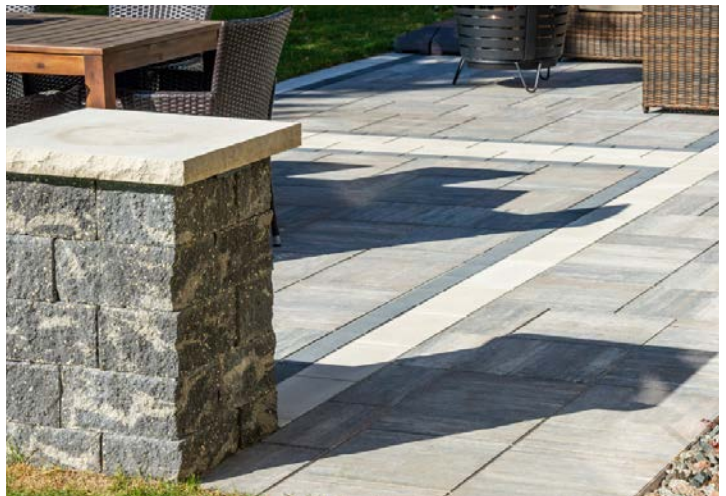

County Materials' pavers are manufactured using Genesis Face-Mix Technology™. This technology produces pavers to ensure quality and lasting performance without compromising design or aesthetics. Each unit is designed to withstand wear in high traffic areas. With a high strength surface layer, pavers can withstand freeze/thaw cycles throughout their prolonged service life.

Tribute Retaining Wall units in Graphite were installed as a seat wall to further define the space. County Materials' diverse color offerings allowed these homeowners to seamlessly incorporate this seating feature to their design.

County Materials' locally and readily available products were essential in meeting the homeowners' one-week timeline. Over 700 SF of landscape materials were installed to create an inviting outdoor living space that leaves a lasting impression.

County Materials' locally and readily available products were essential in meeting the one-week timeline.
