Consolidated
Construction Co., Inc.

Engineer:

Larson Engineering

Product Manufacturer:

County Materials
Corporation

Date:

2021

Key Products:

Shadow Stone™ Block and
Horizon™ Splitface Block

County Materials' Diverse Masonry Selection Offers Solution to Office Addition

Solutions: Concrete masonry products offer diverse texture and style selection

Weldall Manufacturing built an addition to accommodate their growing business, seeking a durable masonry solution that would complement their existing office building. They worked with Rural Masonry to select the ideal concrete masonry product.

County Materials' Shadow Stone™ Block and Horizon™ Splitface Block proved ideal for their color selection and dimensional appearance. Shadow Stone Block was used throughout the building, creating a natural textured aesthetic. To further accentuate the façade, Horizon Splitface Block in White form two accent strips that wrap around the building.

County Materials offers concrete masonry products in a variety of shapes, colors, facing options, and sizes to meet the needs of any project. Our diverse selection allowed Weldall Manufacturing to find a product cohesive with the exterior of their existing building.

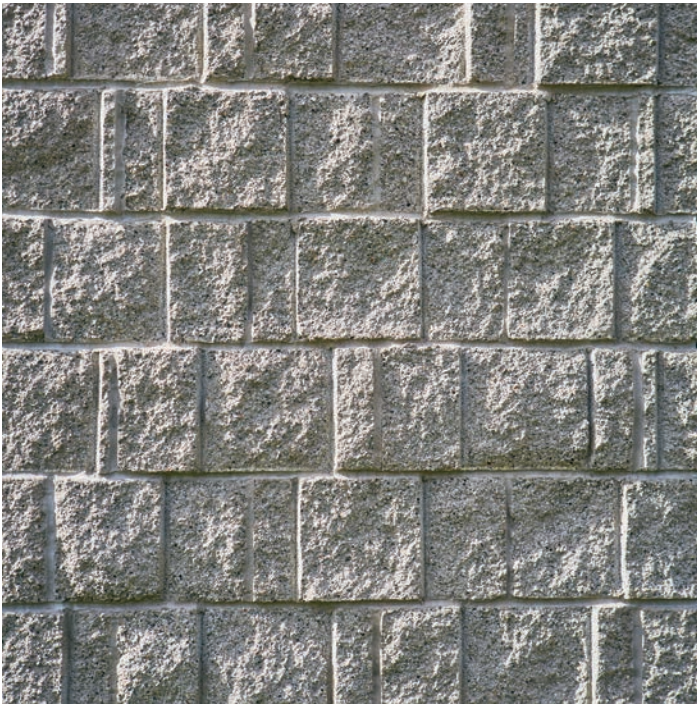

Continued on page 2.

Shadow Stone units offer the aesthetic of natural stone and the reliability of concrete. These durable units are integrally blended and maintain their appearance throughout their extended service life. Manufactured to last, concrete masonry products can withstand the elements, reducing maintenance and the need for reconstruction.

More than 9,500 SF of concrete masonry units were manufactured and delivered by County Materials. A wide selection of local and readily available products allowed Weldall Manufacturing to quickly choose a solution and maintain the construction schedule.
