

CASE STUDY

PROJECT DETAILS

Project Name:

Graze Provisions & Libations

Location:

Minneapolis, MN

General Contractor:

Horizon Roofing

Architect:

ESG Architects

Product Manufacturer:

County Materials Corporation

Date:

2019

Key Products:

Skylands™ Concrete Deck Pavers

Rooftop Dining Space Created Using County Materials' Skylands™ Concrete Deck Pavers

Solutions: Pedestal system offers safe and durable rooftop patio for customers

Graze Provisions & Libations is a food and beverage collective located in the North Loop neighborhood of Minneapolis, MN. Throughout the building, independent vendors serve a variety of foods and drinks. To expand seating for their customers, Graze sought to develop an outdoor patio space. Horizon Roofing worked with the owners of Graze Provisions & Libations to select a low maintenance and durable rooftop solution.

County Materials' Skylands Concrete Deck Pavers were selected to meet the project's specifications and design. Concrete pavers are an inherently strong product that can withstand the wear of high traffic areas and freeze/thaw cycles. Using Genesis Face-Mix Technology™, Skylands pavers are manufactured with an integrally blended, high strength concrete mix, that results in a vibrant, long-lasting color. Available in a variety of color options, Skylands pavers in Vision were selected for their light reflective color, lowering the patio's surface temperature in the summer heat.

Continued on page 2.

Installed using a pedestal system, the pavers form even joints that direct storm water away from their surface, allowing for proper drainage. Skylands Concrete Deck Pavers protect the roof membrane from UV rays and simplify maintenance, as each unit can be removed.

County Materials' Skylands Concrete Deck Pavers are a safe, efficient rooftop solution that provides customers safe, steady footing and additional space to enjoy the outdoors. More than 3,000 SF of Skylands Concrete Deck pavers were used to create the outdoor dining space.
