

Oversized 32" Concrete Masonry Unit

The Next Generation of Masonry

Manufactured in the USA by

Achieve ultimate efficiency with an evolutionary concrete masonry solution

County Materials manufactures standard and specialty concrete block units that meet industry standards. With the use of **8" x 8" x 32"** or **12" x 8" x 32"** CMUs, even the tightest of construction schedules can be met without sacrificing durability and strength.

Units may be customized with a center score, providing the appearance of two 16" units, or opt for the popular long linear look. Both units are interchangeable with all specials.

Refer to County Materials' Masonry Designer's Catalog for Standard and Special CMU shapes and sizes.

High Value Benefits

County Materials' 32" Oversized Concrete Masonry Units were designed to help masons safely and efficiently erect buildings faster, and with less effort. Due to the unit's extended size, it takes about the same time to install an Oversized 32" CMU using a hoist system, but cover double the amount of length of a traditionally sized unit. This efficiency maximizes productivity and construction schedules.

Additional Benefits:

- Durable and fire resistant material
- Can be manufactured in a variety of sizes and appearances
- Saves on labor and material costs
- When properly installed, it reduces fatigue and physical wear
- Can be manufactured with a center score to look like traditionally sized units

Oversized 32" Concrete Masonry Unit

Technical Specifications

Unit Size (Nominal)	Unit Weight	Units/Pallet
8"x 8"x 32"	77 lbs.	36
12"x 8"x 32"	95 lbs.	24

Safe Installation

County Materials' Oversized 32" CMUs are engineered to be used with a mechanical hoist system, or with two-person installation. As the industry faces skilled labor shortages, mechanical lifting equipment makes it possible for an individual mason to lift and maneuver Oversized 32" CMUs at a consistent pace, further reducing installation time. Additionally, hoist systems increase productivity by shortening the job schedule and eliminating fatigue and physical wear and tear on individuals that are typically associated with repetitive heavy lifting.

Economical Solution

County Materials' Oversized 32" CMUs allow masons to maximize construction schedules while saving costs on both materials and labor when used with mechanical lifting devices. The units increase budget efficiency with the power to lay the equivalent of two units at once. Longer units mean fewer blocks are laid per course. Larger units also reduce the number of joints required, saving on mortar costs and joint tooling. Using mechanical equipment, these larger sized units drastically reduce installation time and keep teams moving faster. Our Oversized 32" Concrete Masonry Units are available and delivered to meet project expectations, even when schedule changes occur, saving your team project time and labor costs.

County Materials aims to comprehensively solve our customer's challenges. That's why our Oversized 32" CMUs complement our extensive masonry product line and offer construction professionals a unique material solution that maximizes jobsite efficiency, quality and productivity.
