PROJECT DETAILS

Project Name:

Gladiola Street Residence

Location:

Coon Rapids, MN

Contractor:

Northern State
Landscaping

Products Used:

Grand Discover® Pavers,
Destination® Pavers, and
Elements™ Paving Stones

Minnesota Homeowners Create Inviting Living Spaces with County Materials' Concrete Landscape Products

Solutions: Concrete pavers in a variety of colors, textures, and shapes create multiple inviting outdoor spaces

County Materials' distinctive color palette for concrete landscape materials caught the eye of these homeowners when they decided to upgrade their backyard living space. More than 700 SF of concrete pavers and paving stones in three styles were used to bring to life the homeowners' vision for a patio with multiple inviting living spaces.

Grand Discover Pavers in Majestic and two colors of Elements Paving Stones were specified for two living spaces, including one with a free-standing fire pit. The smooth surface texture and larger size of the Grand Discover Pavers provides a safe and stable tread, while the clean lines of the Elements Paving Stones create a luxurious aesthetic. Both products are part of County Materials' dimensionally compatible paver series, offering unlimited design flexibility and unmatched installation efficiency.

Continued on page 2.

Destination Pavers in Intention completed the design with a third living area. Available in nine sizes that fit together seamlessly in a variety of combinations, Destination Pavers can be arranged in simple, repeating patterns or used in one-of-a-kind combinations to create dramatic designs that mimic natural stone.

Concrete pavers resist the effects of weather and wear and require minimal maintenance over a long service life. Readily available materials and timely delivery from County Materials helped Northern State Landscaping complete the project without any delays.

County Materials' distinctive color palette for concrete landscape materials helped bring to life this homeowner's vision for a patio with multiple inviting living spaces.
