Grand Discover® Pavers,
Elements™ Paving Stones

Contractor:

Outdoor Innovations

Date:

2021

Durable Landscape Products from County Materials Transform Outdoor Space

Solutions: Concrete pavers from County Materials create durable entertainment space

Concrete pavers from County Materials in various sizes and colors helped these homeowners create a stunning outdoor entertainment space.

The homeowners envisioned a backyard with diverse elements that required durable surfaces in complementary colors.

Grand Discover Pavers and Elements Paving Stones offered the colors and finishes to unite a project that includes a kitchen, mini golf area, pool, water features, and pergola. The two lines are part of County Materials' dimensionally compatible paver series and crafted to increase design versatility and improve installation efficiency.

Continued on page 2.

Pavers also were used to create a pathway welcoming guests from the front entrance of the home to the entertainment area in the backyard.

County Materials' concrete pavers provide a high strength surface that can withstand the elements and frequent use. The landscape contractor relied on our pavers to build a safe, level pool deck with a bold design and functional outdoor kitchen area.

More than 4,000 SF of concrete pavers were used to transform this backyard and create a space for the homeowners to enjoy for many seasons.
