

## CASE STUDY

## PROJECT DETAILS

**Project Name:**

Rain Auto Wash

**Location:**

Merrill, WI

**Project Owner:**

Rain Auto Wash

**Contractor:**

MV Services, Inc.

**Architect and Engineer:**

Marathon Technical  
Service

**Date:**

2021

**Key Products:**

Splitface Masonry Units

## Splitface Masonry Units Prove an Attractive and Affordable Solution for Merrill Car Wash

**Solution:** Car wash developer seeks economy and design versatility in concrete masonry units

Long lead times and high costs prompted the owner of Rain Auto Wash to reconsider the use of premanufactured walls for the construction of a new car wash. The enterprising entrepreneur turned to County Materials' Splitface masonry block to get the job done quickly and affordably.

With growing pressure to complete the car wash in time for the busy winter car wash season, County Materials promptly delivered 8,700 SF of splitface concrete masonry units—1,500 SF in Blackened Ash and 7,200 SF in Gray—to help the owner achieve an appealing two-tone design.

Construction of the automated drive-through car wash was completed within two weeks, comfortably meeting the customer's deadline.

*Continued on page 2.*

Splitface masonry units from County Materials lend a rugged yet refined look to construction projects of all types, with unique surface textures on every block creating an ever-changing visual appearance throughout the day. This durable and simple-to-install material is also low maintenance and fireproof, making it a long-lasting and affordable choice.
