Nature's Quest Landscape
and Design

Product Manufacturer:
County Materials
Corporation

Date:
2020

Key Products:
Elements™ Paving Stones,
Summit Stone®
Landscape Units

Elements™ Paving Stones and Summit Stone™ Landscape Units Create a Functional Backyard Space

Solutions: Diverse landscape products offer patio solution

When deciding to replace their deck and update their backyard patio, these homeowners sought a durable concrete landscape solution. A combination of County Materials' Elements Paving Stones and Summit Stone Landscape Units were used to create a functional patio entertainment space. Concrete landscape products were preferred by contractors for their durability and design flexibility.

County Materials' Elements Paving Stones in several sizes were used to create an attractive, dimensional patio design. Field pavers in Reflection and soldier coursing in Vision added visual interest to the space. Summit Stone Landscape Units formed a seat wall and end pillars. With our diverse color options, these homeowners were able to color match their patio and seat wall.

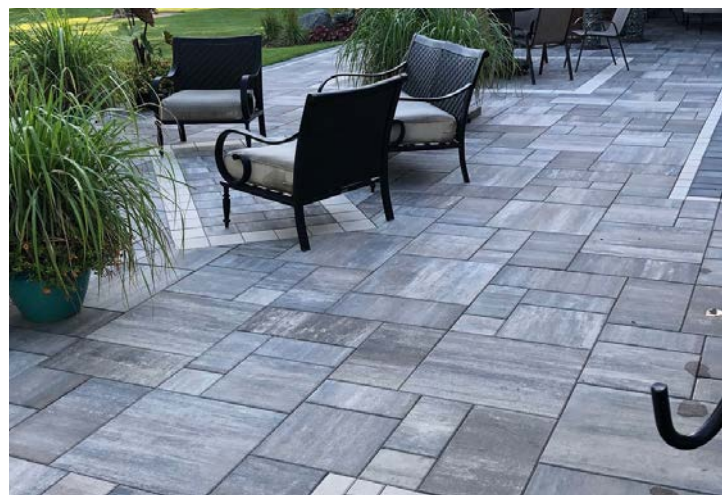

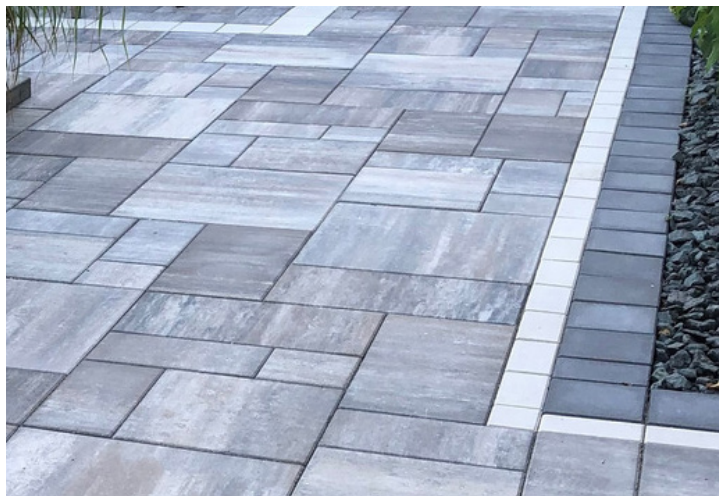

Continued on page 2.

Manufactured using Genesis Face-Mix Technology™, each paver is integrally blended, ensuring long-lasting color and unmatched strength. Concrete pavers also resist wear in high traffic areas and freeze/thaw cycles during the winter months, offering extended service life.

County Materials' locally and readily available landscape products were used to transform this backyard into a functional space for entertaining and enjoying the outdoors. More than 1,600 SF of concrete landscape products were delivered to meet the homeowners' timeline.
