

CASE STUDY

PROJECT DETAILS

Project Name:

Meridian Business
Campus Buildings A & B

Location:

Aurora, IL

Owner:

Distribution Realty Group

General Contractor:

ARCO Murray
Construction

Erector:

MVP Erectors

Engineer:

Structural Resources

Key Products:

Insulated Sandwich Walls

Product Manufacturer:

County Prestress

Date:

2021

Insulated Sandwich Walls Accelerate Construction and Provide Lasting Performance Benefits

Solution: Prestress wall panels are a versatile solution for industrial buildings

County Prestress was selected to manufacture and deliver insulated sandwich wall panels for two industrial buildings in the Meridian Business Campus in Aurora, Illinois. The buildings were designed to appeal to high-end logistics companies in a park-like setting. Building materials with unmatched efficiency and design flexibility were specified for these modern warehouses.

County Prestress supplied 285 wall panels comprised of more than 115,000 square feet for the two buildings. County Prestress used its enhanced production capacity to manufacture the wall panels with short lead times. Additional time and cost savings were achieved through a coordinated delivery schedule that kept the project on task for completion despite weather delays.

Continued on page 2.

Insulated sandwich walls are an efficient and economical choice for large-scale projects that demand installation efficiency and design flexibility. They offer low life cycle cost with enhanced R-values and reduced maintenance. County Prestress' Insulated Sandwich Walls are manufactured in PCI-certified facilities to meet industry standards for quality.
