

Precast Elevator Shafts

Elevator Shaft

Elevator Drawings

Precast Shafts (Patent Pending)

Manufactured in the USA by County Prestress & Precast

Precast shafts manufactured by County Prestress & Precast are a more efficient alternative to conventional concrete masonry shafts. Rely on us to deliver and install precast elevator and stair shaft components to meet the toughest construction schedules.

What's Included

- Signed and sealed shop drawings from specialty engineer
- 6" thick precast concrete shafts up to 6 stories tall
- 6" thick precast roof cap
- Wide flange hoist beam
- Transportation
- Installation equipment and labor
- Fire caulking

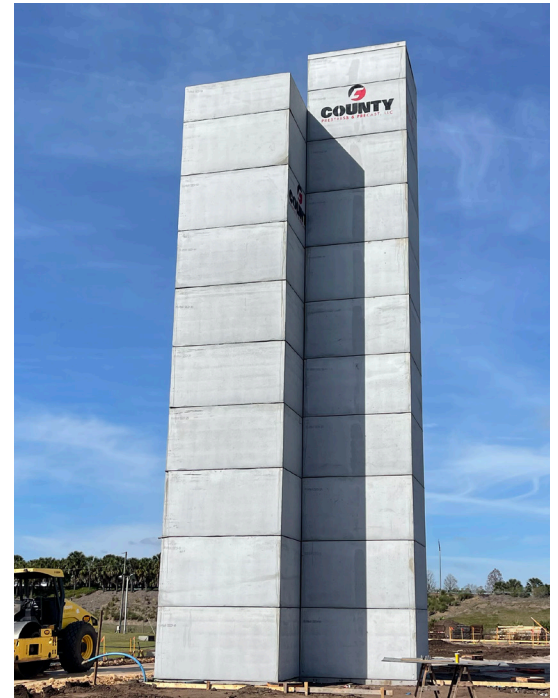

Consider the Advantages

- Ideal for long-lasting residential mid-rise structures.
- Optimize time and cost savings with ready-to-install components and all-weather installation.
- Accelerate construction schedules by weeks or even months compared to concrete masonry structures.
- Fire ratings up to 3 hours.
- Manufactured with a compressive strength of 6500 psi and precise dimensions in our NPCA-certified plant.
- Rigorous quality control inspections during production.
- Responsive customer service and trusted products.

Precast Stair Shafts

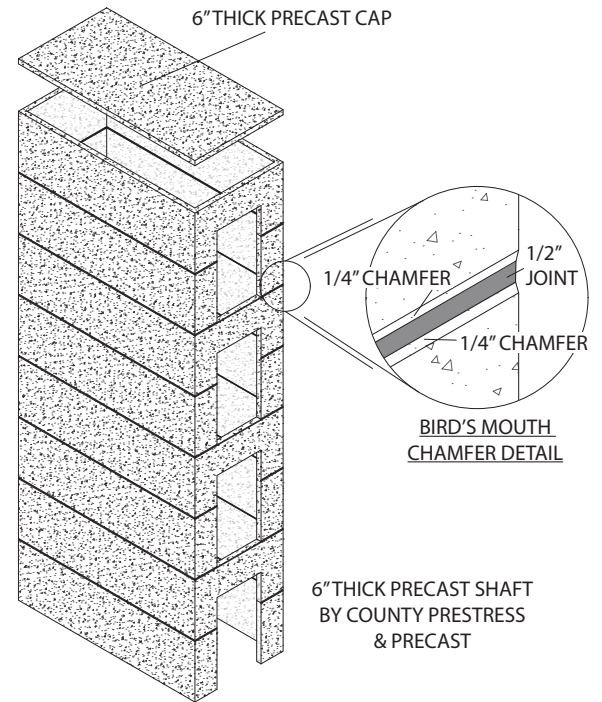

Four Story Stair Shaft

Stair Shaft

Stair Shaft Drawings

(Patent Pending)

Avoid dangerous temporary ladders and expensive temporary stairs.

Precast Stair Shafts allow immediate access for:

- Stair installers and tradesmen
- Inspectors
- First responders
- Fire suppression pipe stand

County Prestress & Precast is your source for resilient precast elevator and stair shafts. We are headquartered in Westmont, Illinois and supply products throughout the greater Midwest and Southeast. *Patent Pending*
