Reliable foundations for electrical transformers

Manufactured in the USA by County Prestress & Precast

Source your electrical transformer foundations from an industry-leading manufacturer of prestressed and precast concrete construction products. Our transformer pads use a 6500 PSI mix design for enhanced compressive strength and durability. Our manufacturing facilities have high production capacity and can offer short lead times on large-scale orders.

Consider the Advantages

- Strong, durable, and stable
- Efficient installation
- Sustainable building material
- Long service life with minimal maintenance
- High volume production capacity
- Short lead times

Product Specifications

- 6500 PSI mix available
- Manufactured to specification
- Lifting eyes for installation

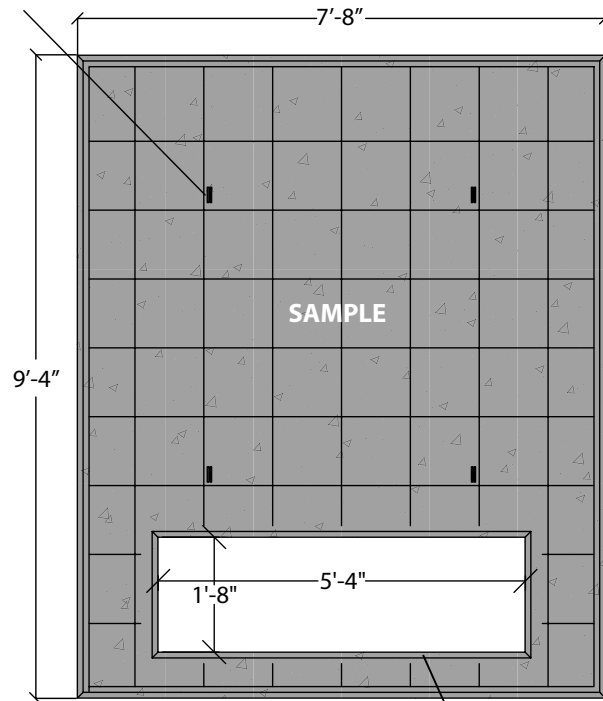

Your Full-Service Partner

County Prestress & Precast is your source for reliable concrete construction solutions. Our long-lasting products are readily available and easy to install. We perform extensive quality testing to deliver satisfactory results. Rely on us to deliver precast transformer pads to meet the toughest project schedules.
