

PRIMA BASE™

MONOLITHIC MANHOLE BASE

PRIMA BASE™

Advancing Precast Concrete Production

County Materials is proud to introduce Prima Base™—a state-of-the-art monolithic manhole base—bringing the next generation of precision precast concrete technology to Wisconsin. Engineered for unmatched performance in sanitary and stormwater systems, Prima Base™ sets a new standard for durability and accuracy.

Key Features:

- Single-pour construction using a sustainable, high-performance concrete mix—completely eliminates cold joints.
- Precision-milled inverts produced using engineer-approved CAD data for superior flow and fit.
- Flexible compatibility with a wide range of pipe penetration connections.
- Meets ASTM C-478 specifications for reinforced concrete manholes.

Advantages

- The channel, inlets and outlet are manufactured to precise dimensions and locations, specifically produced to project requirements
- Optimized flow achieved through channel geometry generated by 3D design software and smooth surface texture
- Variable inlet and outlet heights can be produced in a single casting
- Consistent channel appearance regardless of intricacy
- Channel depth control
