

Prima Base™ Monolithic Manhole Base

Taking precast reinforced concrete production to the next level.

Leading the advancement within our industry, County Materials is proud to introduce a new production technology to Wisconsin, the Prima Base.

Prima Base™ Monolithic Manhole Base

A state-of-the-art, high-precision manhole base, designed and manufactured to provide unrivaled quality in sanitary and stormwater management systems.

- Manufactured in one pour with a sustainable, high-quality concrete mix that eliminates all cold joints
- Incorporates a precision milling process that uses data from engineer approved drawings
- Ability to utilize multiple types of penetration connections
- Manufactured to ASTM C-478 Specifications

Advantages

- The channel, inlets and outlet are manufactured to precise dimensions and locations, specifically produced to project requirements
- Optimized flow achieved through channel geometry generated by 3D design software and smooth surface texture
- Variable inlet and outlet heights can be produced in a single casting
- Consistent channel appearance regardless of intricacy
- Channel depth control
